

**BOARD OF WATER SUPPLY
CITY AND COUNTY OF HONOLULU
REQUEST FOR EXEMPTION FROM
CHAPTER 103D**

DATE: July 15, 2019

TO: Ernest Y.W. Lau, P.E.
Manager and Chief Engineer

VIA: Procurement Office

FROM: 
Kevin Ihu
Water System Operations

RE: REQUEST FOR EXEMPTION FROM CHAPTER 103D for the selection and award of a contract for rental of a two megawatt mobile generator.

Pursuant to Section 103D-102(b)(4), Hawaii Revised Statutes (HRS) and Subchapter 9, Chapter 3-120 of the Hawaii Administrative Rules (HAR), I am recommending that an exemption be granted from the provisions of Chapter 103D, HRS, for selecting a contractor to award a contract to Hawthorne Power Systems for mobile emergency generator rental services.

Vendor Name & address: Hawthorne Power Systems
94-025 Farrington Highway
Waipahu, Hawaii 96797

Amount of the contract: \$119,996.24

Term of the contract: 4 months

Prior exemption contract numbers: none

- A. **Background:** The 2019 hurricane season for Hawaii is predicted to be as busy as 2018's hurricane season. The 2018 hurricane season brought the first ever hurricane landfall on Maui and two storms that were very close to making landfall on the Island of Oahu.

BWS has an Emergency Generator Plan which identifies pump stations that are needed to provide water to key locations during disaster recovery. Mobile generators are BWS's only means to power up pump stations should the main source of power from HECO not be available during the recovery period.

Hospitals, shelters, command centers, and other critical disaster relief stations are located at the key locations. During an extended power outage, without the generator, a key pump station would not be able to be powered impacting the ability to sustain water service to some of those facilities.

Hawthorne has the only mobile generator unit available for rental that is big enough to power key pump stations identified in the Emergency Generator Plan. Hawaii is already under a hurricane tracking period where disturbances are being tracked and predicted to strengthen to hurricane status when entering into the central pacific area.

To ensure that the generator is available for use, it is in the BWS's best interest to immediately procure the generator rental services from Hawthorne for the remainder of 2019's hurricane season enabling the BWS to be better prepared should a storm result in a disaster situation.

B. Describe how procurement by competitive means is neither practicable nor advantageous to the Board of Water Supply (BWS)

Hawthorne is the only vendor that has a mobile generator of that size, 2 megawatts, readily available for rental.

C. Details of the process or procedures to be followed in selecting the vendor to ensure maximum fair and open competition as practicable

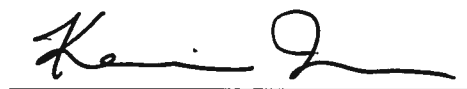

There are no other vendors on the island of Oahu that has a 2 megawatt mobile generator readily available for rental.

Accordingly, I recommend your approval to exempt the award of a contract for the rental of a 2 megawatt mobile generator from the provisions of Chapter 103D, HRS. The application of this exemption will be limited to these facts and circumstances and may not be used as precedence to award any other contracts.

I certify that the information provided above is to the best of my knowledge, true, correct.
