PEARL HARBOR, HAWAII 96860-5300

DEC 24 1990 *ky*

IN REPLY REFER TO:

11150  
Code 700A  
17 December 1990

Ms. Arlene M. Kabei, Manager  
Solid and Hazardous Waste Branch  
Hawaii State Department of Health  
Five Waterfront Plaza, Suite 250  
500 Ala Moana Boulevard  
Honolulu, Hawaii 96813

Dear Ms. Kabei:

In response to your request of 22 October 1990 for self certification of compliance with federal release detection requirements for underground storage tanks, enclosures (1) and (2) are provided. Enclosure (1) is the listing of Naval Supply Center tanks forwarded in your letter. Of the 43 tanks shown, 34 are field constructed and deferred from release detection requirements in accordance with 40 CFR Part 280, Subpart A. Field constructed tanks are annotated in enclosure (1).

Enclosure (2) provides self certification forms for the nine tanks which are not field constructed. Only two of the nine tanks remain in service. One tank and associated piping were removed in March 1989. The remaining six tanks are empty with permanent closure planned in the future. One of the six empty tanks was reported as a petroleum UST in 1986 on EPA form 7530-1. This tank (#10, building 444; facility ID 9-100992) was actually used as a boiler blow down pit and contained only water. It was removed from service approximately twenty years ago. Since it never stored petroleum or other regulated substances, this tank should be excluded from 40 CFR, Part 280 requirements. Of the two tanks in service, one is less than 110 gallons and excluded from federal release detection requirements in accordance with 40 CFR, Part 280, Subpart A. This tank (PC-6, facility ID 9-100993) has capacity of 66 gallons and is located at Pearl City Fuel Annex.

Sincerely,

D.P. OUBRE  
Commander, U.S. Navy  
Director, Fuel Directorate  
By direction of the  
Commanding Officer

Enclosure:

- (1) Underground Storage Tank listing
- (2) DOH Self Certification Forms
